PERSONAL INFORMATION

Name:	Barış İrhan
Date of Birth:	10.04.1977
Place of Birth:	Ankara, Turkey
Nationality:	Turkish
Marital Status:	Divorced, 1 children (7 years old)
Address:	Pfaffenwaldring 54, 70569, Stuttgart
Telephone:	+49-176-74519826
E-mail:	barisirhan@gmail.com
Link:	https://github.com/bi100477/MyDocuments

LANGUAGES

- German – Little
- English – Very good
- Turkish – Native

EDUCATION

- **Dr.-Ing., Stuttgart University, Institute of Construction Materials,**
  2011-2014, Stuttgart, Germany
  - Developed CIF (Contact Impact and Fragmentation) 3D explicit finite element analysis program. GUI (Pre/Post) by Borland C++, FE-Core by Intel Fortran"
  - Developed CIF-JOB simulation manager program using Borland C++
- **M.Sc., Stuttgart University, COMMAS Master Program,**
  2001-2003, Stuttgart, Germany
- **M.S., Middle East Technical University, Civil Engineering,**
  1999-2002, Ankara, Turkey
- **B.S., Middle East Technical University, Civil Engineering,**
  1994-1999, Ankara, Turkey

WORK EXPERIENCE

- **Research Associate, Stuttgart University, Institute of Construction Materials,**
  08.2018-07.2019, Stuttgart, Germany
  - Developed general purpose finite element research and analysis program based on plug-in-play client-server message passing interface for the simulation of different physical processes. GUI (Pre/Post) by Borland C++, FE-Core by Intel Fortran
- **Software Developer, PROYA Software Company,**
  02.2008-03.2018, Ankara, Turkey
  - Worked as a member of software team gathered to develop COMOSYS (Construction Modelling Systems) program, an object-oriented software for the analysis, design and detailing of commercial and industrial buildings
  - Developed GUI, topological data structures and algorithms for 3D positioning of reinforcement bars
- **Military Service as Civil Engineer, MSB İzmir İnşaat Emlak,**
  08.2006-07.2007, İzmir, Turkey
- **Research Assistant, Stuttgart University, Institute of Construction Materials,**
  07.2005-05.2006, Stuttgart, Germany
  - Developed a finite element program for the implicit simulation of large-deformation frictionless-contact based on penalty and augmented-lagrangian formulations together with adaptive-mesh-refinement and adaptive-remeshing algorithms in 2D and 3D using Matlab
  - Transferred this program into Fortran

- Developed an interface to FEMAP for pre- and post- processing (http://www.plm.automation.siemens.com/en_gb/products/femap/)

- **Research Assistant, Technical University of Munich, Institute for Computational Mechanics,** 09.2003-09.2004, Munich, Germany
  - Developed algorithms for 2D two-phase fluid flow simulation based on coupled Levelset-XFEM method
  - Collaboration on a diploma thesis on overlapping domain decomposition methods for flow simulations
- **Teaching Assistant, Middle East Technical University, Department of Civil Engineering,** 11.1999-08.2001, Ankara, Turkey

ADDITIONAL WORK EXPERIENCE

- **Part-time Lecturer, Çankaya University, Department of Civil Engineering,** 2017-2018 Fall Semester, Ankara, Turkey
  - Course CE 224 Strength of Materials
- **Part-time Lecturer, Middle East Technical University, Department of Engineering Sciences,** 2014-2015 Spring Semester, Ankara, Turkey
  - Course ES 224 Strength of Materials
- **Part-time Lecturer, Atılım University, Department of Civil Engineering,** 2014-2015 Fall Semester, Ankara, Turkey
  - Course CE 319 Numerical Methods

PROGRAMMING SKILLS / TOOLS

- Intel Fortran, Borland C++, Matlab, OpenGL
- JIRA, Confluence, SVN

HOBBIES

- Tennis
- Tango dance
